

Aman Ramashry Yadav

Data Science & AI Student | Python | SQL | Machine Learning | Data Analysis

Mumbai, Maharashtra, India

PROFILE

Data Science and AI student with hands-on experience in Python, data analysis, machine learning model development, SQL, Excel and statistical analysis. Interested in building practical AI/ML applications and turning data into useful products.

EDUCATION

B.Sc. Data Science & AI — Bhavan's College, Mumbai

12th Science — 80.83%

TECHNICAL SKILLS

Programming: Python, R, SQL **Data:** Statistics, Excel, Data Analysis **Web:** HTML, CSS **ML:** Regression, Classification, Decision Trees, Random Forest, XGBoost

PROJECTS

Heart Attack Classification — Machine-learning classification project deployed with Streamlit for predicting heart-attack risk from input features.

Wine Type Prediction — Classification model for predicting wine type, packaged as a deployable Streamlit application.

Salary Prediction — Regression-based ML application for estimating salary from selected input features.

HealthGuard — Healthcare-focused hackathon concept designed around AI-assisted health risk awareness and a practical application flow.

LifeSorted — Product concept focused on organizing life, goals, routines and creator workflows with AI-powered features.

CERTIFICATION / LEARNING

Advanced Machine Learning with Python — CDPL Certification Course (ongoing learning and project-based practice).
